Summary

Enthusiastic and motivated IT graduate with a solid foundation in programming, database management, and networking. Eager to apply academic knowledge to real-world projects and contribute to innovative technology solutions.

Projects

HOUSIFY: REAL ESTATE MANAGEMENT SYSTEM

GLS University
03/2025 - Present

Summary Of My Work

- Tech Stack: React.js, Node.js, Express.js, MySQL
- Developed a full-stack real estate platform that allows users to list, browse, and search properties with ease.
  Integrated a machine learning model to provide accurate price predictions based on factors like location, size, and amenities.
  Implemented user authentication, dynamic filtering, and responsive UI using the MERN stack
  Designed database schema, UML diagrams, and generated MIS reports for system analysis and reporting.

FurniVibe: Online Ecommerce Website

Gujarat University
11/2023 - 02/2024

Summary Of My Work

- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL
- Developed a dynamic e-commerce website for browsing and purchasing furniture products online.
  Implemented core features including product catalog and management, user authentication, order checkout system, and order history system.
  Designed responsive UI with modern layout and connected the frontend with a PHP-MySQL backend for real-time data handling.
  Enabled category-based filtering, search functionality, and order management for managing products and orders.
